***Terminal Disclaimer***

1. The terminal disclaimer filed on July 12, 2011 is improper because an attorney or agent, not of record, is not authorized to sign a terminal disclaimer in the capacity as an attorney or agent acting in a representative capacity as provided by 37 CFR 1.34 (a). See 37 CFR 1.321(b) and/or (c).

***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a

nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-14, 16-18, 52 and 57-60 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 26-49 of copending Application No. 10/543,247. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the '247 application fully encompass the claimed subject matter. The bone substitute material has a compressive strength from 20 to 80 MPa. The bone substitute material has the cells with a structure set out in the claim because the bone substitute material was produced by the same approach disclosed in the specification of the present invention. Further, note that the foam is compressed in a region to provide a variation in the cell size. The foam with elongated foam cells would be inherently present during the step of compression.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. The double patenting rejection will not be withdrawn until the resubmission of the terminal disclaimer.
